REQUEST FOR BIDS: Video Security System - Cliff View Library

ADDENDUM NO: 1

DATE: 2/9/2021

This addendum is issued for informational purposes, and is hereby made a part of the RFB documents.

QUESTIONS AND ANSWERS

Question 1: Will you be using Milestone as the VMS (video management software) for this project since you have it at other locations?

Answer 1: We have not decided if we will use Milestone as the VMS. That will need to be in the quote. We have not decided on which Software we will use.

Question 2: What are the speaker specifications?

Answer 2: Our speaker specifications are that they need to tie into our Mitel phone system so we can make announcements and that the announcements can be heard throughout the entire library and the outside patio.

Question 3: Where are the speakers tying in? Bibliotecha or VMS?

Answer 3: The speakers are turning in back in the server rack.

Question 4: What software other than Milestone is acceptable?

Answer 4: Any software that is comparable to the Milestone version we outlined in the RFB.

Question 5: What compatibility is required for Bibliotheca?
Answer 5: The system needs to be motion activated and allow us to see when people are coming in and out of the building and not break or set off the Bibliotheca system.

Question 6: Is there an existing system to make announcements with?

Answer 6: We have no system in place at Cliff View. Currently we use our phone system to make announcements at other locations.

Question 7: Is the wireless camera on the light pole only for operation at night?

Answer 7: No. This needs to work around the clock with a focus on reading license plates.

Question 8: All equipment must be compatible with Bibliotheca’s Open+. What level of integration is required?

Answer 8: The equipment must be integrated to not set off any alarms connected to Bibliotheca.

Question 9: Do you have a list of compatible manufacturer’s products?

Answer 9: We do not have a list of compatible manufacturer’s products. Most products and systems are compatible.

Question 10: Are the speakers a add-on to the existing Bibliotheca system or will an additional PA system be required?

Answer 10: An additional PA system will be required.
